

UNI FILTER T

Portable unit with **mechanical filtration**, provided with:

- articulated arm IBS series L=3 m
- metallic pre-filter (G2)
- acrylic filter (G4)
- high efficiency bag filter (F9)

Activated carbon on request

Model	Dimensions mm (bxlxh)	Nominal fan flow m3/h	Weight
UNI FILTER T	830x720x1210	2.800	110

UNI mobile unit with high efficiency suction fan in a negative pressure sound-insulated compartment. The ideal solution for users engaged in small-scale welding operations involving low pollutant concentrations. The excellent manoeuvrability and highly ergonomic use of this unit ensure it can be utilised in several different work stations, while the flexible arm (our IBFC model) is able to operate over a working radius of 3 m. IP65 electrical control panel, complete with filter clogging indicator, machine trip indicator in the case of incorrect direction of motor run (optional), and all suction fan protective devices and indicators. Filter section composed of spark trap metal mesh prefilter; large capacity dust accumulation pocket bag filter with efficiency class F7 (to EN 779).
