

DC AirCube 1200

Part No. 111 000

The new DC AirCube is a highly efficient and robust air cleaner with the ability to clean the air even in large areas, at a rate of up to 1100 m³/h. The encapsulated fan housing contains an eco fan of the radial type which builds up a high pressure in the whole flow range, giving effective air cleaning for the entire service life of the filter. The speed of the fan is also steplessly variable in order to save energy, for example at night. The DC AirCube 1200 is equipped with both a HEPA H13 filter which captures the smallest particles, and an indicator lamp for filter replacement.

- HEPA filter, 5 m²
- Stepless eco fan
- Indicator for filter replacement

DC AirCube 2000

Part No. 102 000

With a flow of up to 1800 m³/h, the new DC AirCube 2000 is the most powerful single-phase air cleaner on the market. The DC AirCube 2000 has a robust chassis made of stainless steel and an encapsulated eco fan with steplessly variable speed control.

The new ergonomic design makes it easy to handle and transport, and it will even operate lying on its side. The DC AirCube 2000 has a HEPA H13 filter of fully 10 m², which effectively filters out the smallest and most hazardous particles. An integral indicator tells you when the filter needs to be replaced.

- HEPA-filter, 10 m²
- Stepless eco fan
- The market's most powerful air cleaner
