

The ultimate in dust extraction solutions by **TES**

# The Titan Reverse Jet Dust Extractor

## UK manufactured

Designed, manufactured and assembled in the heart of the UK which not only ensures **quick lead times** but also, **high manufacturing and build quality** with its heavy gauge steel construction

## Quick installation

The modular design means that it can be **installed quickly** with minimum fuss

## Compact design

It is **compact** to ensure the minimum space is taken away from your production and gives our extractor the **maximum versatility**

## Internal or external

Designed specifically for medium to high volumes of air requirement and can be **housed internally or externally**

## For all industries

Inside the extractor are filter cartridges which are simple to remove and replace and give a much larger filter area than other designs. The range of filter options available mean **we can suit all applications in all industries**

## No downtime

Reverse Jet Cleaning ensures continuous cleaning of the filter cartridges and **no downtime** which ensures **maximum efficiency** extraction

## Maximum safety

If you are **handling explosive dusts** our unit comes fitted with an Explosion Relief Panel and anti static features for **maximum safety** under ATEX Regulations

Rotary Valves are available for processing of dust into the quick release waste container or heater system, this also provides additional explosion and flame containment barriers

**TOTAL EXTRACTION SOLUTIONS LTD**
