

ProfiMaster

Robust quality with large filter

Applications

- » Also suitable for high alloy steel
- » Low to medium amounts of smoke/dust
- » Occasional to frequent use

Benefits

- » Maintenance door allows easy filter change
- » Safe operation by rotation field control
- » Exhaust arm requires less adjustment due to exhaust hood design
- » Increased safety with filter monitoring

Properties

- » Rotating exhaust hood
- » Two-stage filter
- » Automatic Start/Stop (optional)
- » Exhaust arm 4 m

ProfiMaster is a robust filter unit for occasional to frequent use with low to medium amounts of dust. The high capacity disposable filter can easily be changed. The rotating and swiveling exhaust hood enables use in a 360-degree radius and ensures only few adjustments during welding.
