

DC AirCube 500

DC AirCube 500

Our new air cleaner, the DC AirCube 500, is a clear solution for airborne dust problems. This is an extremely simple way of decreasing dust concentrations in a working environment.

Highlights - DC AirCube 500

- Stainless Steel.
- Pre-filter change without opening the unit.
- HEPA-filter area as much as 4.2 m² and new shape for better handling - dust free change by a cardboard box disposed with the filter. Longer lifetime through cleaning effect when unit is shaken.
- Possible to stack.
- Handle that you can wind the cable on to.
- Electrical outlet for lighting and other accessories. (max 1300 W).
- Filter indicating (lamp).
- Optional exhaust hose (Part No 2420). The hose is flexible, but the max of 3 m is recommended. The hose is sold per m. A gear clamp 104-138 mm is also required (Part No 4138).
- Inlet cone/module for Ø 125 mm hose (Part No 42753) for connection to, e.g. a ventilation hood in a bakery.

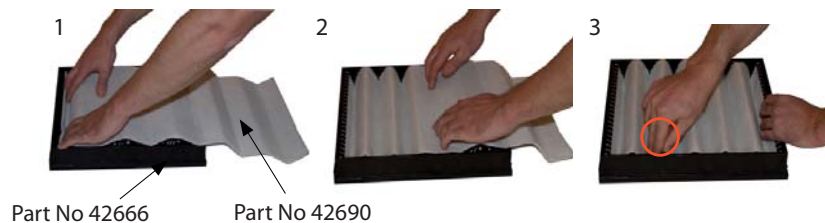

Part No 112501, 230 V, UK

Part No 112503, 115 V, UK

Change of prefilter

Possible to stack
Higher Airflow
Stainless steel housing with outlet
Bigger HEPA- and prefilter

Technical data DC AirCube 500

Technical data	DC AirCube 500
Weight	13 kg
HxWxL	380x340x495 mm
Flow, at open outlet	500 m ³ /h
Negative Pressure	max 400 Pa
HEPA H13 filter	4,2 m ²
Soundlevel Speed 1	45 db(A)
Soundlevel Speed 2	65 db(A)
